Stratiam® for infrastructure, the foundation of digital services.
Downtime costs money, so when infrastructure fails the cost and reputational damage caused can be monumental. Whilst it's important to monitor all facets of your infrastructure, it even more important to ensure you are monitoring the metrics that matter. Stratiam® integrations enable you to connect with all your underlying tooling data to pull those all important metrics allowing you to surface and visualise the status of your service infrastructure on our unique SMARTile® technology and blended infrastructure dashboards.

Stratiam® provides a unified view of your operational infrastructure, what is happening right now in real time, quickly identify what facet of the digital delivery path is suffering from latency, degradation, and failure of a component, or 3rd party service. Lifting and surfacing the important metrics is a major part of providing a great end-user

Stratiam® unifies security tooling, elevating insightful real- time forensics. Strengthen your security posture by integrating your cyber defenses and visualising the key defence metrics in a single centralised view. Drill-down seamlessly into diagnostic analytics to rapidly pinpoint threat and breach intelligence data.

Out of the box correlated SMARTiles® and Dashboards enables rapid deployment for insightful visualisation of compromised systems, vulnerabilities and breach incidents.

Stratiam® accelerates your digital change.
Having the capability to ingest all of your data drives the delivery and success of digital initiatives. If you are already down your pathway of digital change or just starting, Stratiam® is your perfect partner to innovate with confidence in being able to visualise where you are on your journey smoothly.

With AI and predictive analytics, you can accurately forecast when you'll be hitting your goals, objectives, understand where challenges and potential bottlenecks may cause deviations to your plans so you can be ahead of the curve and maintain relevance in the markets you operate.

Stratiam® differentiation for MSPs.
The challenge for (MSPs) Managed Service Providers, is removing the burden of deployment, onboarding and support of the services you provide to your customers. You need to maximise the quality and experience of services consumed by your customers whilst keeping operational costs under control.
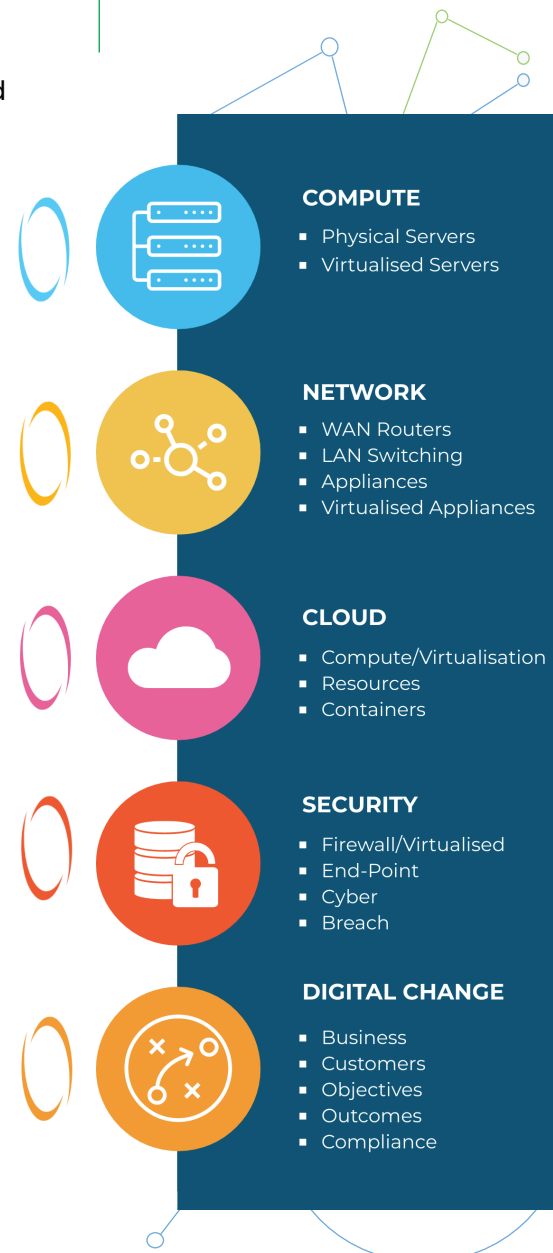

The benefits for MSPs.
1. A platform that provides immediate effective service experience insight
2. Streamline operational efficiency through Stratiam's cloud-native multi-tenanted platform
3. Lower MTTR through enriched insights for rapid root cause
4. Fully branded dedicated 'White-Labelled' managed SaaS platform options
